

TREND MICRO OfficeScan⁵

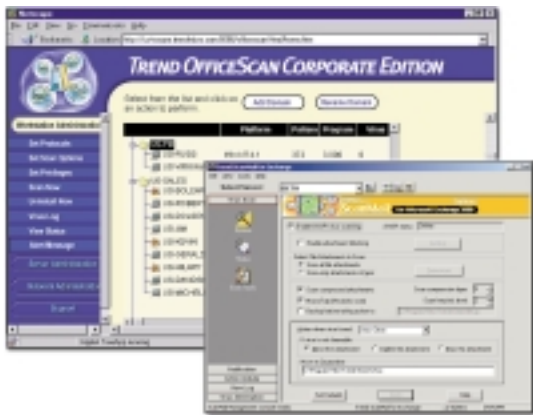

The complete antivirus solution for small businesses for Microsoft Small Business Server 2000

Trend OfficeScan™ for Small Business Server 2000 (SBS2000) is the complete antivirus solution for businesses employing Microsoft Small Business Server 2000. OfficeScan for SBS2000 provides a comprehensive antivirus solution protecting your server, workstations, and email allowing you to safely do business over the Internet and share resources in your network.

OfficeScan for SBS2000 installs on the server and centrally deploys to workstations, eliminating the need for action by the end user. By running on the server rather than the desktop, OfficeScan for SBS2000 protects the entire enterprise from virus infections. It also detects and removes viruses hidden in email attachments and public folders in real time. OfficeScan for MS SBS2000 antivirus agents residing on the workstations shield servers from any attempted virus attacks.

- ▶ Easy, customizable deployment
- ▶ Complete virus protection for the server, workstations, and email
- ▶ Centralized real-time reporting, configuration, and updates
- ▶ Intercepts viruses in email messages and attachments in real time
- ▶ File attachment blocking provides instantaneous protection against new virus threats
- ▶ Sends customizable virus warnings to email sender, recipients, administrators, or selected users
- ▶ Outbreak alerts trigger email or pager notifications to administrator
- ▶ Virus pattern, scan engine, and program files are automatically updated
