

TREND MICRO

# OfficeScan™ Corporate Edition

## CENTRALLY MANAGED DESKTOP VIRUS PROTECTION

### PROBLEM

Many administrators spend a significant amount of time dealing with viruses and trying to contain virus outbreaks. In large or small enterprises, it is inconvenient and inefficient for the network administrator to keep individual desktop antivirus software properly configured and updated.

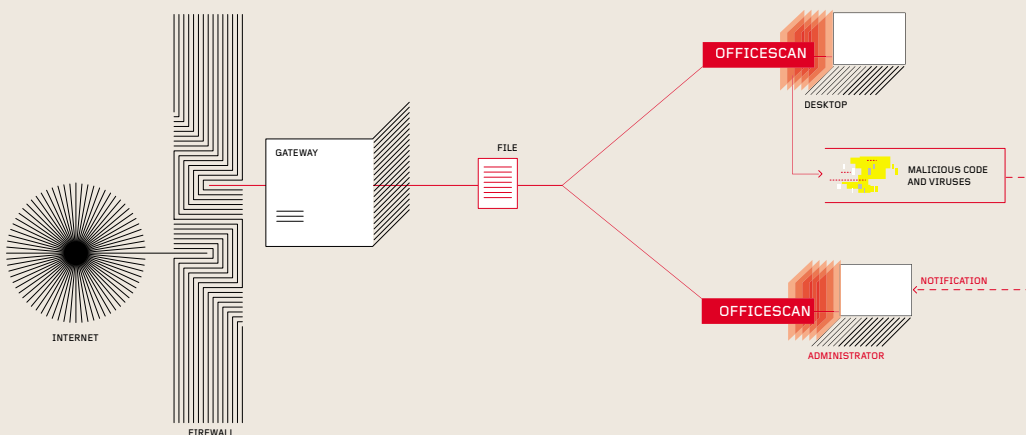

### STRATEGY

Trend Micro OfficeScan Corporate Edition's server-based centralized management and deployment features allow administrators to manage and enforce antivirus policies for the entire organization and react quickly during an emergency from nearly anywhere on the network through a Web-based management console.

- Quick, customizable installation
- Anywhere, any time access from a Web-based management console
- Centralized real-time management and bi-directional communications
- Prevents end-users from altering or disabling antivirus software
- Automatic update requires no client intervention
- Supports multiple Windows™ client platforms

*"...Unique to all other products we tested, OfficeScan is the only one with a Web-based management program that can be accessed through a browser from any computer on the network. .... for a Windows NT network, (OfficeScan) is as slick as it gets."*

—Small Business Computing Magazine  
November 2001

### OFFICESCAN™ AT WORK

OfficeScan removes and blocks infected files in real time; the file is immediately prevented from reaching end-users and the administrator is notified.

# Trend Micro™ OfficeScan™

## COMPREHENSIVE VIRUS PROTECTION

- Helps eliminate viruses, Trojans, worms, and other malicious code threats that arrive at the desktop through multiple channels
- Includes a Trojan cleaning tool that activates upon system boot-up and scans for viruses inside POP3 format email

## CENTRALIZED MANAGEMENT, CONFIGURATION, AND REPORTING

- Web-based management console for anywhere, any time access through the Internet for software updates, client configuration changes, and emergency procedures
- Centralized control capabilities allow administrators to lock down client configurations so end-users cannot alter or disable their antivirus software
- Administrators can configure for real-time, on-demand, or scheduled scans on a per client basis
- Customizable reports provide better visibility of client security and reports can be transformed into SQL for flexible data management

## EASY AND CUSTOMIZABLE DEPLOYMENT

- Install and deploy through a variety of methods, including the support of hard disk imaging, Windows NT remote installation, and ActiveX embedded Web page for remote offices
- Installations for multiple clients can be performed simultaneously within a minimal timeframe
- OfficeScan can automatically uninstall other popular antivirus software products for easy replacement

## AUTOMATIC SOFTWARE UPDATES

- Automated and centralized update and deployment are designed to keep antivirus up-to-date without end-user intervention and may be updated in groups to maximize deployment efficiency while minimizing impact to network bandwidth
- Incremental pattern file updates help speed the update process, especially for remote offices using low bandwidth connections
- Mobile users can also download updates directly through the Internet for greater convenience

## THE ADVANTAGES OF TREND MICRO

- **Global Innovation:** Trend Micro has been a pioneer in the antivirus software market since 1989, developing innovative strategies to protect information as new computing standards are adopted around the world
- **Server Market Leadership:** Trend Micro is the global leader in server-based antivirus software, with a market share of more than 60% at the Internet gateway (IDC bulletin, 2001)
- **Flexible Best-of-Breed Technologies:** Trend Micro antivirus products and services are designed to integrate seamlessly with leading firewalls, intrusion detection systems, and other best-of-breed solutions for the complete enterprise strategy
- **Service and Support:** Trend Micro products and services are backed by TrendLabs, a leading antivirus research and support center that monitors potential security threats worldwide, developing the means to identify, detect, and eliminate new viruses

# TrendLabs

## AWARD-WINNING 24x7 SUPPORT

TrendLabs' ISO 9002-certified global headquarters and five regional centers back Trend Micro products with timely, high-quality service. A team of more than 250 engineers operates around the clock to monitor virus activity, develop information on new threats, and deliver prompt, effective solutions.

For more information about Trend Micro service and support, contact TrendLabs at <http://www.trendmicro.com/support>.

## TREND MICRO CONTROL MANAGER™

### Total Centralized Management

Trend Micro Control Manager integrates various layers of virus protection into an enterprise-wide content security strategy. Administrators can view virus activity, configure defenses, set security policies, and update protection throughout the network from a single console at any location.

## SYSTEM REQUIREMENTS

### OfficeScan Server

- Intel® Pentium® II 233MHz/64MB RAM/200MB disk space
- Windows™ NT 4.0 SP5 or above, Windows 2000 Professional/Server or Novell NetWare 3.12, 4.2, 5, or 6
- Microsoft® Internet Explorer® 4.0 or above
- Microsoft Internet Information Server® (IIS) 3.0 or above (Required for HTTP-based communications)

### OfficeScan Client

- Intel Pentium 233MHz/15MB RAM/ 20MB disk space
  - Windows 95/98/Me/NT 4.0 SP5 or above/Windows 2000/ or Windows XP
  - Microsoft Internet Explorer 4.0 or above
- ### Web or Windows-based Management Console
- Intel Pentium 133MHz/64MB RAM/30MB disk space
  - Microsoft Internet Explorer 4.0 or above
  - Windows NT 4.0 SP3 or above, Windows 2000 Professional/Server, or Windows 95/98/Me with Microsoft Internet Explorer 4.0 or above and secur32.dll version 4.10.1057 or above
