

TREND MICRO

ScanMail™ for Exchange™

SECURE THE MICROSOFT® EXCHANGE ENVIRONMENT AGAINST
MALICIOUS CONTENT

PROBLEM

Destructive viruses can enter networks and spread rapidly via email, bringing vital communications to a halt. Spam and other unsolicited messages eat up network bandwidth and affect employee productivity. Inappropriate content or sensitive information circulated and emailed out of your network could inflict devastating costs in the form of lawsuits, a tarnished reputation, or compromised competitive advantage.

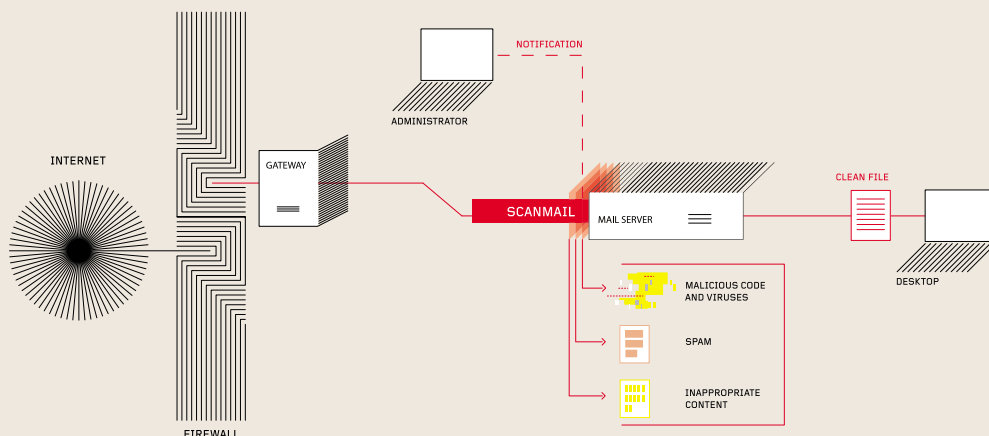

STRATEGY

Trend Micro ScanMail for Exchange with eManager™ delivers the ultimate messaging security strategy: award-winning antivirus and content filtering technology combined with industry-leading service and support. Now enterprise networks can remain safe from viruses while unwanted content is filtered out. It's the most simple and effective way yet to ensure the productivity of an enterprise messaging system.

- A single, integrated solution for virus protection and content security
- Microsoft certified; complies with Microsoft APIs
- Easy to implement, upgrade and customize—with rock-solid stability
- Updated automatically or manually for protection against the latest threats
- Backed by award-winning 24x7 service and support
- Winner of PC Magazine's Editor's Choice Award in 2001
- From Trend Micro, the market leader in antivirus at the email server

"...antivirus solutions like Trend Micro's ScanMail for Exchange 2000 play a critical role in protecting against harmful emails transmitted by a variety of products."

—Mark Levitt, Research Director for Collaborative Computing at IDC, July 2001

SCANMAIL™ AT WORK

ScanMail removes and blocks infected email in real time; the message is immediately prevented from reaching end-users and the administrator is notified. At the same time, eManager prevents inappropriate content from entering or leaving the company via the email server.

Trend Micro™ ScanMail™ for Microsoft® Exchange™

CONFIGURATION IS FLEXIBLE, SCALABLE, AND SIMPLE

- ScanMail makes it easy for administrators to remotely configure ScanMail options, create consolidated logs or reports, customize notifications, gather information about the latest virus outbreak, and check the status of any ScanMail server across the network

ACTIVE MESSAGE FILTER PROTECTS END USERS

- Detects and blocks infected email messages and attachments in real time
- Message purge feature instantly blocks mass mailing viruses and specified attachments
- Eliminates messages with zero-byte attachments to prevent unproductive content from reaching end-users

eMANAGER™ CONTENT FILTERING AND ANTI-SPAM PLUG-IN

- Prevents inappropriate content from entering or leaving the company via the email server
- Lets administrators scan all email content and attachments, including message body content as well as text, HTML and Word document attachments
- Built-in anti-spam policies are fully customizable and empower administrators to specify what type of attachment or content can enter or leave the server

HIGH-PERFORMANCE SCANNING

- Memory scanning and multi-threaded scanning enhance the speed of email scanning and minimize impact on the server (in version 3.8 and above)
- Preserves integrity of messages, attachments and store databases
- Scans all traffic passing to and from the Exchange Information Store; provides protection for SMTP and MAPI protocols, as well as HTTP, POP3, IMAP4 and the Installable File System (IFS) in the Exchange 2000 environment

CLUSTERING INTEGRATION

- Provides virus protection and content security checking for clustered servers to maintain a secure 24x7 messaging and collaboration environment even during an outbreak
- Supports both active/active and active/passive clustering
- Fully compliant with Windows 2000 Advanced Server Clustering for fault tolerance and disaster prevention

EASY, SCALABLE DEPLOYMENT

- Administrators can deploy ScanMail to a single server or to multiple servers simultaneously from any local or remote system

THE ADVANTAGES OF TREND MICRO

- Global Innovation: Trend Micro has been a pioneer in the antivirus software market since 1989, developing innovative strategies to protect information as new computing standards are adopted around the world
- Server Market Leadership: Trend Micro is the global leader in server-based antivirus software, with a market share of more than 60% at the Internet gateway (IDC bulletin, 2001)
- Flexible Best-of-Breed Technologies: Trend Micro antivirus products and services are designed to integrate seamlessly with leading firewalls, intrusion detection systems, and other best-of-breed solutions for the complete enterprise strategy
- Service and Support: Trend Micro products and services are backed by TrendLabs, a leading antivirus research and support center that monitors potential security threats worldwide, developing the means to identify, detect, and eliminate new viruses

TrendLabs

AWARD-WINNING 24x7 SUPPORT
TrendLabs' ISO 9002-certified global headquarters and five regional centers back Trend Micro products with timely, high-quality service. A team of more than 250 engineers operates around the clock to monitor virus activity, develop information on new threats, and deliver prompt, effective solutions.

For more information about Trend Micro service and support, contact TrendLabs at <http://www.trendmicro.com/support>.

TREND MICRO CONTROL MANAGER™

Total Centralized Management

Trend Micro Control Manager integrates various layers of virus protection into an enterprise-wide content security strategy. Administrators can view virus activity, configure defenses, set security policies, and update protection throughout the network from a single console at any location.

SYSTEM REQUIREMENTS

- Minimum Intel® Pentium® or compatible 200MHZ processor; 128MB RAM minimum, 256MB RAM recommended, and 50MB disk space
- Microsoft® Exchange™ 4.0, 5.0 or 5.5 (all service packs), or Exchange 2000 SP1 and above
- Windows™ NT 3.51 (SP5 or higher), NT 4.0 (SP3 or higher), or Microsoft Windows 2000 Server, Microsoft Windows 2000 Professional and Microsoft Windows 2000 Advanced Server
- A Java-enabled Web browser that supports frames, such as Netscape Navigator 3.0 (or above) and Microsoft Internet Explorer 3.0 (or above) for Web-based management
