

INTUITIVE INFORMATION SECURITY
FOR THE ENTERPRISE

SPRING 2002

TREND MICRO

ServerProtect™

THE KEY TO EFFICIENT NETWORK ANTIVIRUS MANAGEMENT

PROBLEM

In a networked environment, it is harder to quarantine infected users therefore a single virus can spread quickly. The more users share files via file servers and storage systems, the greater the risk of the network becoming infected and the greater the potential for damage caused by a virus infection.

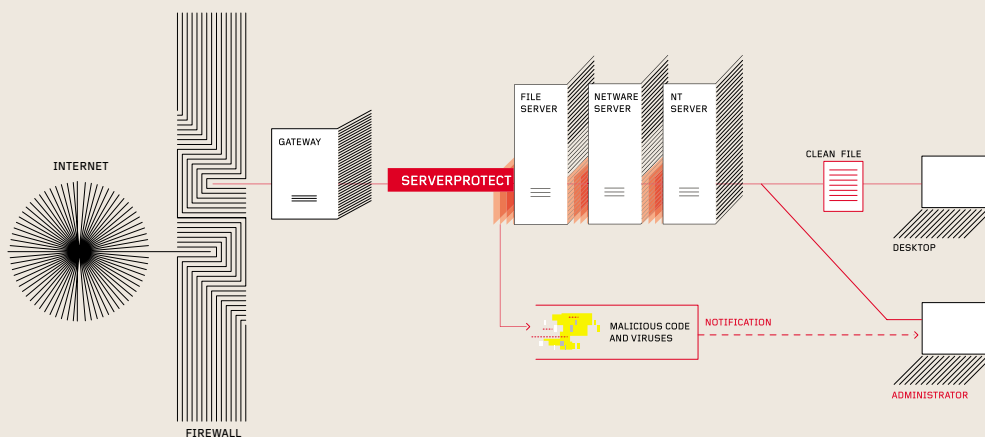

STRATEGY

Trend Micro's ServerProtect provides comprehensive antivirus scanning throughout the network for file servers running Windows™ 2000/NT and Novell™ NetWare. Managed through an intuitive and portable console, ServerProtect provides virus outbreak management, centralized virus scanning, virus pattern file updates, event reporting, and antivirus configuration.

- Real-time protection against viruses, Trojans, and worms
- Provides remote installation, maintenance, and upgrades from a central console
- Automates routine antivirus maintenance and updates
- Alerts administrator of virus outbreaks and emergency conditions
- Certified for Microsoft™ Windows 2000 and Windows NT

"Because the company has built ServerProtect from the ground up to support large networks, you know it won't collapse when it runs into your monster LAN. Conversely, the product also easily scales down to accommodate smaller networks."

—Johnathan Chau, Windows™ NT Magazine

SERVERPROTECT™ AT WORK

ServerProtect removes and blocks infected files on application and file servers running Windows™ NT/2000 or Novell™ NetWare operating systems. Files are immediately prevented from reaching end-users and the administrator is notified.

Trend Micro™ ServerProtect™

CENTRALIZED MANAGEMENT

- Antivirus software can be managed from a single management console
- Installation can be grouped into domains so multiple servers can be configured simultaneously
- Centralized reporting enables administrators to view the status of the entire network
- Network management can be done with limited resources and budget
- Through Task Manager administrators can easily direct such virus maintenance tasks as configuring scanning, pattern and program file updates, compiling virus logs, and setting parameters for real-time scanning

FAST SCANNING AND UPDATES

- ICSA-certified to detect and clean 100% of in-the-wild viruses
- Recursive scanning of most compressed file formats including ARJ, Diet, LZEXE, LZH, PKLITE, PKZIP, and Microsoft Compress, as well as UUENCODE and MIME email message attachments
- Automatically downloads and distributes virus pattern files, scan engine, and program files

EVENT NOTIFICATION AND LOG REPORTS

- Administrators can view the antivirus history of the entire network in aggregate in a central log file
- Log records can be analyzed within the ServerProtect Management Console or exported to other programs
- Virus and program events can trigger a notification to alert the administrator of a virus outbreak
- Alerts can be sent via message box, pager, printer, Internet email, SNMP trap, or written to the Windows NT event log

THE ADVANTAGES OF TREND MICRO

- **Global Innovation:** Trend Micro has been a pioneer in the antivirus software market since 1989, developing innovative strategies to protect information as new computing standards are adopted around the world
- **Server Market Leadership:** Trend Micro is the global leader in server-based antivirus software, with a market share of more than 60% at the Internet gatewa. (IDC bulletin, 2001)
- **Flexible Best-of-Breed Technologies:** Trend Micro antivirus products and services are designed to integrate seamlessly with leading firewalls, intrusion detection systems, and other best-of-breed solutions for a complete enterprise strategy
- **Service and Support:** Trend Micro products and services are backed by TrendLabs, a leading antivirus research and support center that monitors potential security threats worldwide, developing the means to identify, detect, and eliminate new viruses

TrendLabs™

AWARD-WINNING 24x7 SUPPORT
TrendLabs' ISO 9002-certified global headquarters and five regional centers back Trend Micro products with timely, high-quality service. A team of more than 250 engineers operates around the clock to monitor virus activity, develop information on new threats, and deliver prompt, effective solutions.

For more information about Trend Micro service and support, contact TrendLabs at <http://www.trendmicro.com/support>.

TREND MICRO CONTROL MANAGER™

Total Centralized Management

Trend Micro Control Manager integrates various layers of virus protection into an enterprise-wide content security strategy. Administrators can view virus activity, configure defenses, set security policies, and update protection throughout the network from a single console at any location.

SYSTEM REQUIREMENTS

Management Console

- Windows™ 95/98, Windows NT 4.0 with SP1, SP3, SP4, or SP5
- A monitor with 800x600 or higher resolution (1024x768 recommended)
- Network Protocols and Services: TCP/IP, Microsoft® Network must be running on the installed server

Information Server

- Windows 2000; Windows NT 4.0 SP3 (or above)
- 16MB RAM; 32MB and above
- 50MB of free disk space
- Intel® Pentium® 166MHz processor or faster

Normal Server

- Microsoft Windows NT 4.0 with SP4 (or above)
- Novell NetWare 3.12/4.x/5.x
- 64MB RAM (recommended)
- 50MB of free disk space
- Intel Pentium 166MHz processor or faster
